

Greetings:
Please reject the NAB Petition 04-160.

As a subscriber of satellite radio, I am a consumer buying a product in the market. I have actively sought out and subscribed to XM satellite radio because the programming content is higher in quality, better suited to my listening tastes and information delivered to me via the XM radio is timely to my needs.

Since, subscribing to XM radio, I rarely listen to FM or other broadcast radio. I rarely listen, because the content is usually bad. The commercials and music are repetitive, irritating and frequently offensive.

Should broadcast radio improve in quality and variety, then I might cancel my subscription to XM radio. That decision should be based on quality and competitiveness, not government action.

Again, please reject the National Association of Broadcasters petition 04-160 and politely suggest they improve their products and compete.

Thank you.
Mike Mullins
